B. ADDITIONAL INFORMATION REQUIRED BY BURSA MALAYSIA LISTING REQUIREMENTS

B1. Review of Performance

For the second quarter ended 30 June 2010, the Group recorded a consolidated revenue of approximately RM342.5 million. The cost of sales for the quarter under review amounted to approximately RM331.6 million.

The increase in the consolidated revenue of approximately 14% from RM301.8 million in the preceding year corresponding quarter to RM342.5 million registered in the current quarter under review can be attributed to the favourable upward trend in the pricing of metallurgical coke and majority of the by-products in the current quarter experienced by the Group. The average prices of metallurgical coke, crude benzene, tar oil, coal slime and middlings during the current quarter under review have increased by approximately 35%, 49%, 34%, 51%, and 14% respectively compared with those of the preceding year corresponding quarter. However, the price of ammonium sulphate has dropped by approximately 16% and the price of coal gas remained fairly constant in the current quarter compared to the same quarter last year.

Despite the seemingly favourable pricing of metallurgical coke and the majority of the by-products as mentioned above, the cost of sales had also increased in tandem by approximately 8% to RM331.6 million in the current quarter compared to RM306.5 million recorded in the preceding year corresponding quarter. This was primarily attributed to the increase in the average price of raw material (i.e. coking coal) by approximately 30% in the current quarter compared to the average price registered in the preceding year corresponding quarter.

Given the continuing recovering trend in the coking and steel industry, albeit a gradual one, the Group has managed to record a gross profit of approximately RM10.9 million in the current quarter under review compared to a gross loss of approximately RM4.8 million recorded in the preceding year corresponding quarter. The Group has turned around to register a profit for the period of approximately RM4.8 million for the current quarter under review compared to the loss for the period of RM13.3 million registered in the preceding year corresponding quarter, after two consecutive loss making quarters since the third quarter of 2009.

B2. Variation of results against preceding guarter

The Group's consolidated revenue of approximately RM342.5 million registered during the current quarter represents a reduction of approximately 8% from approximately RM373.6 million in the preceding quarter ended 31 March 2010. The reduction in revenue was primarily attributed to the unfavourable pricing of some of its by-products in comparison with the prices registered in the preceding quarter. The average prices for ammonium sulphate, crude benzene and middlings (which contributed to approximately 5% of total revenue) during the current quarter under review were reduced by 16%, 8% and 2% respectively, the effects of which more than negate the price increase seen in tar oil and coal slime of 13% and 4% respectively compared to the average prices registered in the preceding quarter. Besides, the average metallurgical coke price has only increased by a meager 0.4% in the current quarter under review compared to that of recorded in the preceding quarter (first quarter 2010).

Notes on the quarterly report - 30 JUNE 2010

Cost of sales in the current quarter has correspondingly reduced to RM331.6 million in the current quarter under review compared to RM RM367.9 million recorded in the preceding quarter ended 31 March 2010, a reduction of approximately 9.9%. This was attributed to lower sales volume as well as reduction of approximately 2% of the average coking coal price compared to that of the preceding quarter.

The reduction in the average coking coal price on the back of a slight increase in the metallurgical coke price bodes well for the Group resulting in it recording a profit for the period of approximately RM4.8 million in the current quarter under review compared to a loss for the period of approximately RM2.5 million in the preceding first quarter 2010.

B3. Current year prospects

The Group will continue to focus on its core business activity which is the manufacturing and trading of metallurgical coke and its by-products.

Notwithstanding the improved financial performance shown in the current quarter under review, the Group continues to tread cautiously in light of the current issues affecting the world economy. We anticipate that the steel industry (and that of metallurgical coke) may be faced with a challenging environment moving into the remainder of 2010.

The Group is nevertheless still hopeful of seeing sustainable pricing dynamics both for metallurgical coke and coking coal in 2010 as domestic demand is still expected to be there.

Barring unforeseen circumstances or any unanticipated turn of events, the Group is cautiously optimistic to look forward to having better financial results for the current year.
